 Beth Grossmann – *Vice President*  
 Kelsy Miller – *Healthy Columbia Program Mgr.*  
 Lori Albert McCracken, MSS – *Director of  
Education*  
 Laura Myers – *Director of Dental Services*

When the Sisters of St. Francis of Philadelphia arrived in Lancaster and formed St. Joseph Hospital almost 135 years ago, they planted a seed. From that seed grew the hospital and with the hope that their efforts and their legacy would stretch beyond the walls of the hospital and caring for the sick

but also extend out into the County to create a healthier community in Lancaster. With many twists and turns along the path, the legacy of the Sisters and their dreams of a healthier community now inspire CHI St. Joseph Children's Health as the most re-cent branch of the tree they planted all those years ago.

FY2016-2017 saw significant growth at CHI St. Joseph Children's Health and the birth of new programs as we gained our footing and embraced our calling to create a healthy community. While children remain our focus, we recognized that to have a lasting impact on the health of children we must embrace caring for and strengthening our local families however they are defined.

- Our dental services embrace parent education as an essential element of a child's oral health care.
- Our case management program works to support the health of parents and care givers as a key strategy to improve and protect the health of the child.
- Our education services incorporate learnings for parents so they can support their children in making healthier choices and forming healthy habits.
- Our new behavioral health model embraces the role of the family and family dynamics in the mental health and well-being of the children we serve.

All of our work has been made possible by the support of generous members of the community and the inspiring legacy of the Sisters both of which help to power us forward on the journey to assure that every child in the Lancaster Community has the opportunity to grow up happy and healthy.

God bless,

Thomas L. Regan, DDS  
*Board Chair*

Philip K. Goropoulos  
*President*

## Behavioral Health

We recognized the need for something to change in the behavioral health landscape for children of our community. The time had arrived for a new model of behavioral health services for children and families – a model of care focused as much on prevention as on treatment.

Driven by this one purpose and core belief, CHI St. Joseph Children's Health spent FY2017 designing a system, building a Center and assembling a team uniquely positioned and trained to be the one provider of family-focused behavioral health and psychiatric care in the Community.

Our first behavioral health center began walking with families as partners on their health journeys in August 2017.

## Family Wellness Case Management

Life is easier with a partner. The case management department at CHI St. Joseph Children's Health has been walking in partnership with children and families in the Lancaster Community since 2015. Working as a pair, parents/care givers and case managers strive to assure every child has access to the health services and benefits necessary to grow up healthy and happy.

During FY2016-2017, case managers provided over **25,231 units of services to children and families throughout the Lancaster Community**. Their partnerships with local families helped children access insurance benefits, primary care and dental care in addition to other health-related services.

## Health Education

In a world with a millions of different choices and options, sometimes it is hard to figure out what's the healthiest choice. Education presents the keys to which good health is possible. At CHI St. Joseph Children's Health our children's health education philosophy is based upon four principles

- Engaging children and families through innovative and fun programs.
- Inspiring children and their families to recognize and embrace healthier choices.
- Motivating participants to incorporate healthy choices into their daily lives.
- Forming life-long healthy habits.

During FY2016-2017, **15,239 children and care givers** participated in our education programs.

## Dental Services

Our success in improving the oral health of children throughout the Lancaster Community is driven by three keys essential to un-locking healthy smiles.

1. **Education** – We educate families as to the importance of dental care from the time a child's first tooth appears.
2. **Access** – Our Dental Centers provide many families with the first dental homes for their children. The Centers provide dental care to children regardless of their insurance status or ability to pay.
3. **Consistency** – Getting regular dental care – including an exam every six months – is essential to maintaining a healthy smile.

During FY2016-2017, the Columbia Dental Center completed **4,402 dental visits caring for over 1,600 children in the community**.

## Community Initiatives

Through our Community Initiative Grant Program for FY 2016-2017, CHI St. Joseph Children's Health awarded over \$193,100 to community-based organization in the Lancaster Community to improve the health and well-being of children and families.

### GRANT AWARDEES

#### Fall 2016

Clinic for Special Children  
Diakon Youth Services  
Hands Across the Street  
Lancaster Family YMCA  
Power Packs Project  
SouthEast Lancaster Health Services

#### Spring 2017

Children Deserve a Chance Foundation  
Eastern Lancaster County School District  
Healthy Beginnings Plus  
Horizons at Lancaster Country Day  
SouthEast Lancaster Health Services  
United Way of Lancaster County  
Vision Corps

Hoping to increase the impact of our community investments, CHI St. Joseph Children's Health borrowed from innovative community health models utilized by organization and healthy systems across the United States to develop the Healthy Columbia Project.

The activities and programs of Healthy Columbia address community needs negatively impacting the health and well-being of residents and the Borough.

Healthy Columbia programming is designed to provide the opportunities and the supports necessary to create a healthy and thriving community.

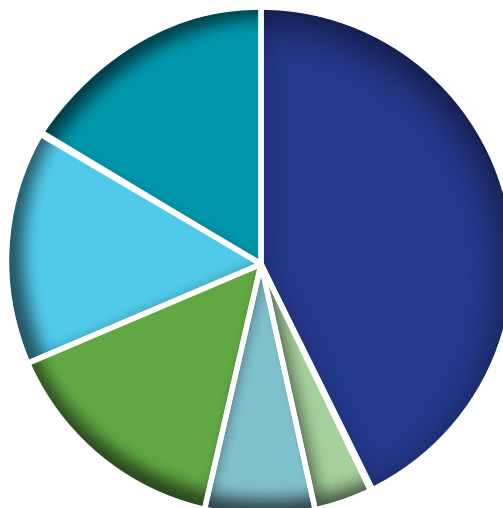

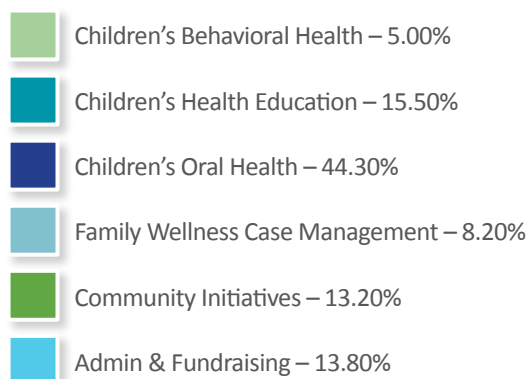

Programmatic focus areas include:

- **Safe Homes and Neighborhoods**
- **Resident Health and Well-being**
- **Early Childhood Experience and Education**
- **Food Security and Nutrition**

## FY2016-2017 Financial Report

CHI St. Joseph Children's Health is committed to being a good steward of the resources with which we have been entrusted. We strive to provide programs of the highest quality while maintaining our administrative and fundraising costs at a minimum to assure that our resources are focused directly on caring for the community and the children and families who access our programs.

### Total Expenses: \$2,891,712

*Planting the seed for a healthy community.*

*Together we can create a community where every child  
has the opportunity to grow up healthy and happy.*
