In August 2017, our long awaited behavioral health program opened. The program introduced a new family-focused approach to children's behavioral health to the Lancaster area providing families a unique behavioral health experience. The program incorporates family wellness coaching and case management into a collaborative approach to psychiatric care and therapy. Community, patient and family response to our approach has been overwhelming and we are thrilled to have been welcomed into the lives of the children and families who have entrusted us with their care.

To start the year, we introduced Healthy Columbia. Through this community transformation initiative, we launched programs, services and activities to improve the health and wellbeing of Columbia Borough. By transforming the health of the community we can and will dramatically improve the health of children and families.

With much to celebrate at the conclusion of FY2018, there remains much to do. Thank you for all of your support throughout the year.

Philip K. Goropoulos, *President*

Education Committed to helping children and families build the necessary knowledge and skills to grow up happy and healthy. Education Department and Health, with Hank, the Health Hero, managed behavioral health program and talk about their feelings and emotions. **Over 18,400 children and 2,250 adults** participated in education programming throughout the year.
